### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Objections***

Claims 2 and 12 are objected to because of the following informalities: In claim 2, line 3, and claim 12, line 3 "a lower collar" should be changed to —said lower collar— to obviate the double recitation of a lower collar. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Hoshino ('742).

See Fig. 10. The support member is item 70, the seat shaft is 64, the locking collar is 73, and the base support is 80.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

Art Unit: 3636

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 11 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hoshino ('742) as applied to claim 1 above, and further in view of Ferguson.

Ferguson teaches a carrying strap removably connectible to the support member (by item 50) to be old and well known in the art. It would have been obvious to one of ordinary skill in the art to modify the Hoshino device such that it had a carrying strap as taught to be old by Ferguson thereby providing the obvious advantage of facilitating portability.

#### ***Allowable Subject Matter***

Claims 2-9 and 12-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The prior art fails to teach a stool including a lower collar with a spike attached thereto and a first member and a second member pivotally attached thereto wherein the lower collar is attached to a lower end of the support member.

#### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Brewer et al, Spitzke, Morin, Caldwell, Gonzalez y. Rojas, Morton, Jr. and Hambleton all teach devices similar to that of the instant invention.
